Today An integrated and holistic learning of Islamic and Intellectual: sciences, rooted to the Quran & Islamic Tradition, which inspires thinking, inquiry, creativity, innovation and includes deep-seated ethos for continuous learning and service to humankind.

The school comes under the ambit of the Islamic religious council of Singapore, MUIS and is registered under the Education Act. MAA offers multiple educational tracks for its students, namely the Cambridge GCE 'O' Level curriculum, the International Baccalaureate Diploma Programme and the Azhar 2.0 Programme.

Vision

Nurturing Islamic Global Scholars & Leaders

Madrasah Aljunied Al-Islamiah (MAA) provides a holistic, integrated learning experience to develop future religious leaders of quality for Singapore.

We aspire to produce graduates who will be innovative Islamic leaders and scholars with the digital competencies to connect with the world.

Success

MAA has collaborated with Dr Damian Bebell from Boston College since 2021 to analyse data the usage of ICT tools and practices that has been in place in MAA. The meaningful and valuable data allows us to reflect on how our educators and learners use technology in school.

One of the biggest success we have is where our educational environment allows the learners to be creative and collaborate with other learners to maximise their learnings without having to sacrifice the main essence of education.

Another standout success of ours include organising an ICT Symposium 2021 where we provided platform for all madrasas to share their best ICT practices. Our strong beliefs in ICT is clearly depicted here with us going beyond our own backyard to organise the event.

Having one to one iPad, our students are engaged in learning using Edu apps like Kahoot, Mentimeter and Padlet. These are further enhanced with their opportunity to learn collaboratively using ICT.

Though technology, learning becomes seamless everywhere in the school where learners are allowed to be connected with one another.

Our learner, [Durrah](#) shared her ICT experience on how technology has enhanced her learning in the school.

This leads to our educators' growth mindset for the need to acquire ICT skills.

These can be seen through the lens of our junior and senior educators;

[Ustaz Ahmad Shamsuddin](#) and [Mr Abdul Malek Razali](#) When you click on their names, you will be able to walk through their ICT journey, understand their undeniable desires to grow in their respective ICT competencies for the sake of their learners.

Madrasah Aljunied Al-Islamiah is the only Madrasah conferred the IB World School status in the world

What's Next?

Having the foundation cast in place, we are prepared and eager to move on to the next phase of our ICT transformation now that the foundation has been laid. We are going to prepare forward with our selective and dedicated trainings for both our instructors and our students, taking the data from our ongoing work with Dr. Bebell into perspective.

We will keep hosting our biennial ICT Symposium for our educators. Our ICT Champions will be working side by side with our teachers to provide ongoing mentoring and support for their professional development.

We will add new ICT workshops to our pupils, including the ones in video editing and coding. This will enable them to have the necessary abilities to add value to their lives in the future.
